Developer and designer who takes a product from the first Figma frame to a live server, including domains, DNS, SSL and deployment. IBM-certified full stack developer, working at Dewaweb as L1 Tech Support and as IT Architect on Dewacloud, and building a production mobile app with an AI-assisted workflow where the design, architecture and final review stay with me.

Ninja of the Month, twice
Dewaweb employee award, May and June 2026, within five months of joining

IBM Full Stack Developer
15-course professional specialization, completed Feb 2026

Live production app
Paramita: designed and architected end to end, in Google Play testing

GPA 3.83
BINUS University, Business Analytics, expected Feb 2027

EXPERIENCE

Dewaweb · L1 Tech Support & Dewacloud IT Architect — Feb 2026 – Present

- **Named Ninja of the Month in May and June 2026**, back to back, within five months of joining.
- **L1 Tech Support:** troubleshoot domains, DNS records, nameservers, SSL certificates and website deployment across Dewaweb's hosting services.
- **IT Architect, Dewacloud:** build cloud environments around each client's needs; for example, **led the ERP migration for a 3,000-outlet F&B chain**.
- Work with Docker and public endpoints on Dewacloud; familiar with load balancing concepts.

Freelance · UI/UX Designer & Front-end Developer — Apr 2024 – Present

- Designed and delivered **10+ responsive projects** in Figma and built them with React, HTML, CSS and JavaScript.
- Improved page performance by **20–40%** through optimized front-end code and asset compression.
- Ran projects from idea to deployment with a **95%+ on-time delivery** rate.

PROJECTS

Paramita · Product Designer & System Architect · paramita.app — 2026 – Present

- Buddhist practice app and bachelor's thesis project, tested by real users on their own phones; now in Google Play testing.
- **Own the UI/UX, brand and system architecture:** offline-first Flutter app with on-device SQLite, syncing to a Go API on PostgreSQL and Redis.
- **AI-assisted, not vibecoded:** I set the design and architecture, write part of the code and choose the dependencies; AI agents do much of the implementation, and I cross-check it and test on a real device before release.
- Release flow across staging and production: database backup before every migration, 23 automated smoke tests, automatic rollback.

terminal.ai.id · Indonesian Stock Market Terminal — 2026 – Present

- Extended the open source OpenTerminal for the Indonesia Stock Exchange: broker summaries, conviction scoring and macro data for **800+ stocks**.
- Migrated **1.18M rows** of broker history into the app; added a Telegram bot and passkey sign-in.
- Self-hosted with Docker Compose and Caddy on Dewacloud, on a custom domain.

Other work — 2025

- **BinusMaya sentiment analysis** (Python): analyzed the sentiment of user feedback on the BinusMaya app.
- **XSJ Billiard** (Astro, Decap CMS): shop site with a headless CMS. **Superstore dashboard** (Tableau): cohort analysis with LOD expressions.

SKILLS

Design: Figma, UX research, design systems, prototyping
Front end: React, Next.js, Astro, Flutter, TypeScript
Back end: Go, Node.js, PostgreSQL, Redis
Infrastructure: Linux, Docker, Caddy, DNS, SSL, cPanel, Dewacloud
Workflow: Git, GitHub, Playwright, AI-assisted development
Data: Python, SQL, Tableau
Languages: English and Indonesian (fluent), Mandarin (moderate)

EDUCATION

BINUS University — Expected Feb 2027
S.Kom., Business Analytics, **GPA 3.83/4.0**

CERTIFICATIONS

IBM Full Stack Software Developer, Coursera, 2026
Data Analyst Associate, DataCamp, 2025
Back-End with JavaScript, Cloud & Generative AI with AWS, Dicoding, 2024

ACTIVITIES

Head of Events, Vihara Delapan Jalan Mulia Youth Staff, 2020 – Present
